

# Hi, I'm **Amanda**. Hear my journey of leadership success with Luxottica.

### How my Optometry career with Luxottica began...

When I was 12 it turned out I needed glasses. Over the years, I developed a relationship with my Optometrist at Laubman & Pank who encouraged me to get into the profession. I ended up doing work experience in Year 10 at this store.

I began my Optometry career with Laubman & Pank because it's such a well-known, reliable and successful brand. They've been around since 1908. I wanted to join a reputable company and create a solid future; Laubman & Pank was an obvious choice.

### Here are just some of the benefits I enjoy...

I have the continual support from everyone at Luxottica; my peers, management and my Regional Eyecare Manager. It doesn't matter what part of the business you're involved in – from Optoms, to Retail, to Leadership roles. Luxottica values what each of us brings to the company, regardless of how big or small.

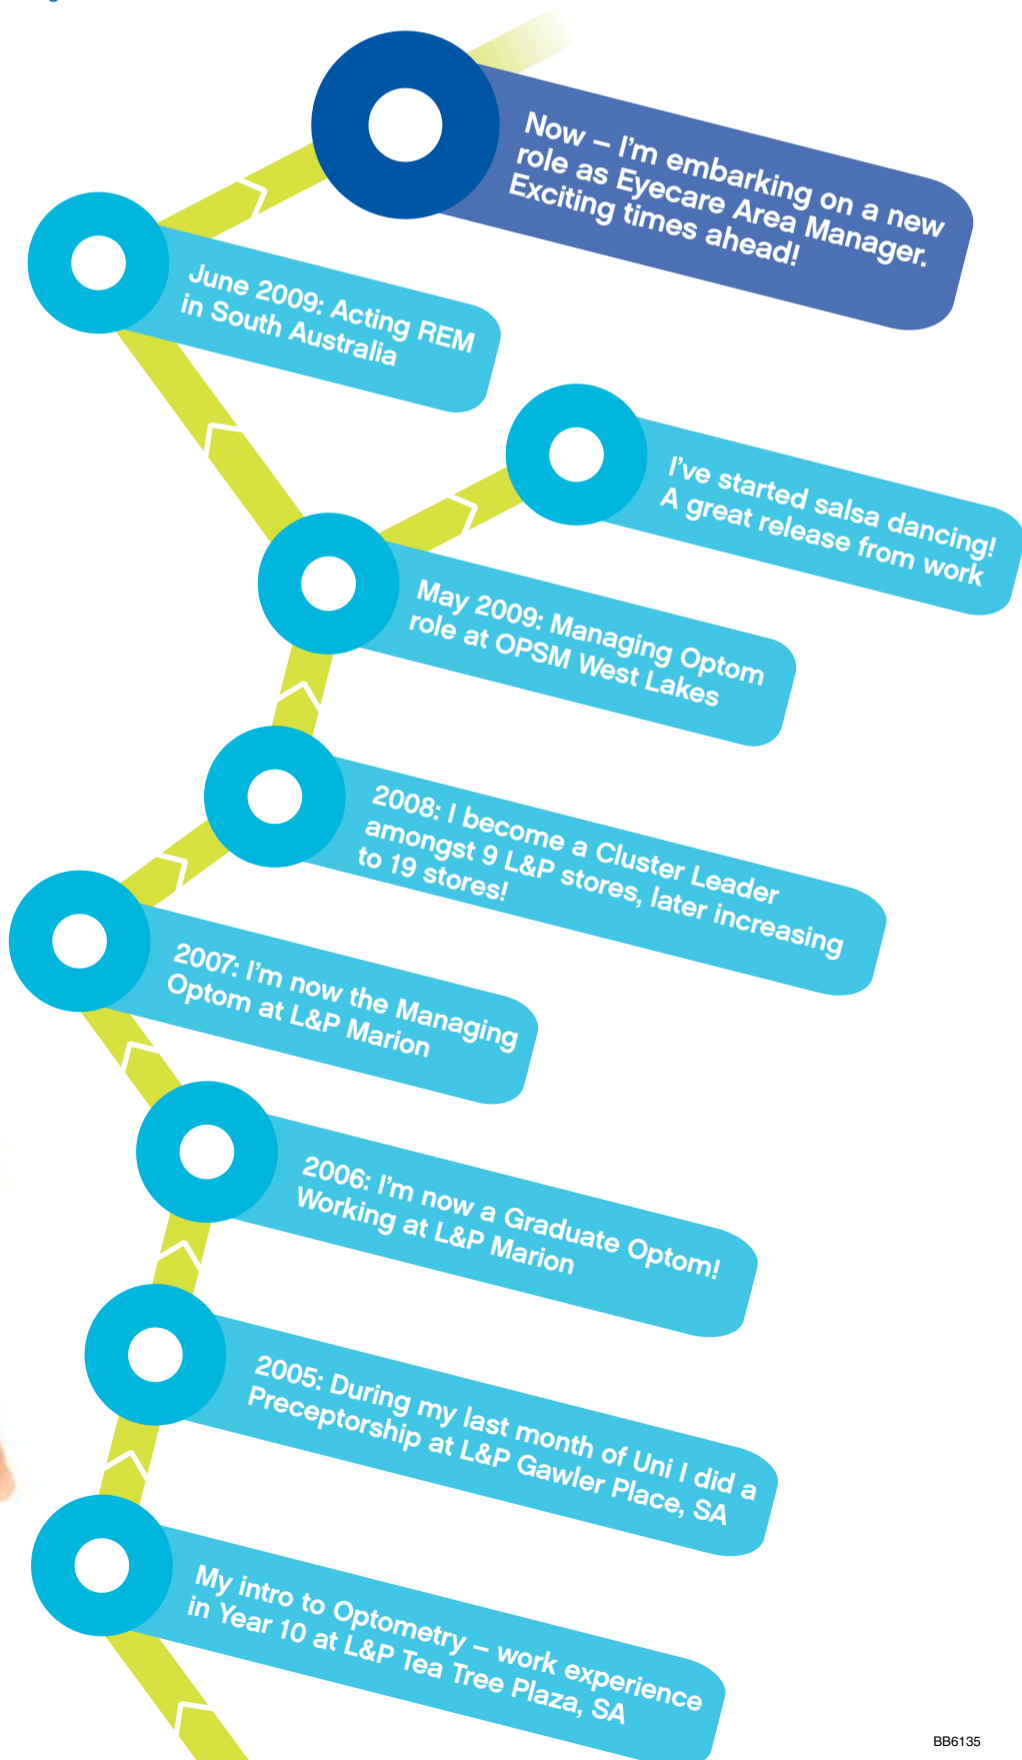

I enjoy a challenge and I'm self motivated, so when Luxottica continues to provide career opportunities, supported by on going training, I can embrace additional responsibility and achieve some big goals... like my new role as Eyecare Area Manager.

### Here's my vision for the future?

It's really refreshing to see a global company 'living' their values. Passion is one of our Characteristics and I'm amazed by the passion everyone at Luxottica shows...it's this level of commitment that drives me to aim higher.

I'd like to develop my leadership skills, becoming the best leader I can. I'm passionate about what I do, and I'd like to encourage others to embrace this same passion. My new role will help me develop these skills...one day I'd like to take full responsibility for Eyecare in a State.

Amanda  
Eyecare Area Manager – SA
